

Web Services and Java Developer

Company: eshots, Inc, the leading interactive event marketing company, delivers event technologies for all phases of the event lifecycle—before, during, and after your event. The eshots Event Lifecycle Suite is an integrated, proprietary collection of products—used individually or in combination with one another— that allow you to Activate your event, Capture consumer data, and Measure event success. Our platform is used at a number of different events including Super Bowl, MLB, NASCAR, College Football, Auto Shows, Ride and Drives, and Concerts.

Job Location: Chicago, IL

Job Description: eshots, Inc. is experiencing rapid growth and seeking a talented web services and Java developer with an entrepreneurial spirit. In this Research and Development role you will be responsible for developing and enhancing our industry leading web-based 'eshots Event Intelligence' product and other key server side products and tools.

The Web Services and Java developer will be a seasoned professional with 3 years experience developing Web Services and Java applications for Web-based systems. The ideal candidate will also have some Business Intelligence and Reporting development experience. The candidate should be comfortable in an entrepreneurial environment and working with a dynamic, collaborative development team. We are seeking an individual who is looking for a new challenge at a smaller, rapidly growing company where they can have a strong impact.

Responsibilities:

- Work under the direction of the Development Manager and Server Team Lead.
- Enhance and develop key components of our Event Intelligence solution.
- Assist in moving our Cold Fusion based applications to a robust Java platform
- Responsible for confirming requirements, developing, unit testing product deliverables to targeted release dates.
- Assist in creating ad-hoc reports and data transfer processes for our clients.
- Contribute creative ideas to the R&D team to improve the eshots product suite.
- Perform rotating technical support role once every 4-5 weeks, which requires answering client calls during technical support hours (including weekends).
- Occasional travel to assist at events is required (less than 20%).

Minimum Requirements

- 3 years Web Services, SOAP and Java n-tier web development experience
- BS/BA in Computer Science, or related field or equivalent work experience
- A strong grounding in object-oriented design and development techniques.
- Experience in writing complex SQL queries (MySQL a plus)
- Excellent skills in core web technologies like HTML, XML, JavaScript, CSS, and DHTML
- Familiarity with Open Source software.
- Experience with Construction and Transition phases of a Project life cycle.
- Results oriented with strong analytical and problem-solving skills
- Good combination of technical and interpersonal skills.
- Experience in migrating from a Cold Fusion platform to a J2EE platform would be helpful
- Business Intelligence application experience would be helpful

Benefits:

- Salary plus bonus
- Health Insurance and 401K Benefits
- Casual work environment

For consideration, please submit resume and salary requirements to careers@eshots.com.
